## HOBBIES

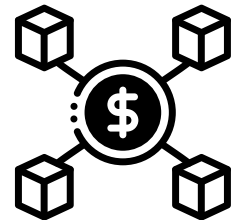

### Photography

Photography changed my view of the world. I notice things that others overlook due to routine. I try to photograph new things every time and thus encourage creativity.

### Reading

I try to read at least a few pages every day, because I often find motivation in them that drives me forward.

### Blockchain

I think that the future is in cryptocurrencies and that paper money will slowly die out. That is why I have been researching Blockchain and individual cryptocurrencies for several years.
